

OUR BIKES

We own a fleet of quality hybrid and mountain bikes made by the leading bike producers in Bulgaria - [Ram](#) and [Drag](#). All of our bike tours are provided with quality bicycles and standard equipment that are included in the price. The bikes come in small, medium, and large sizes with quick release adjustable seat posts to suit any size rider.

The bicycles are equipped with water bottles cage, handlebar bag with map holder, rear rack on request and repair kit (tire pump, tube patches, tire irons, chain tool). Our bikes come in with platform pedals with option for strap fitting. Clients wishing to use clip (spd) pedals must bring their own pedals and shoes. We also provide proper fitting and instruction for clients needing extra attention.

TYPES OF BIKES

Mountain bike: Our **Ram HT 1** is a basic hardtail mountain bike with lightweight aluminium frame suitable for those who ride on asphalt but prefer the geometry of a mountain bike. The bikes are equipped with road tires, 80 mm travel fork and Sram components making shifting and pedaling easy. 26 inch rims and 24 gears. Bikes come in 16, 18 and 20 inch frames. Weight: 13 kg

Hybrid bike: Our **Drag Grand Canyon Pro** bicycles are built for adventure and comfort. They are constructed of sturdy and lightweight aluminum frames which are supplied with front suspension forks to smooth out the ride. The bikes have triple chain rings with 27 gears and flat handlebars with adjustable stem. They ride lightweight on road while durable for off road trails. Weight 14 kg
